

LULU MOSOBE

Junior Software Developer

As a recent graduate from CodeSpace Academy, I bring a robust foundation in HTML, CSS, Javascript, React, and Next.js, coupled with a fervent enthusiasm for crafting user-centric solutions. Eager to contribute to dynamic web projects, my goal is to leverage my technical proficiency and design acumen within a collaborative Software Development team.

-

Soft Skills

- Skilled in articulating complex ideas across diverse audiences, fostering collaboration with cross-functional teams and stakeholders.
- Proficient at identifying challenges and implementing innovative solutions, aligning design decisions with user needs and business objectives.
- Ability to think critically and strategically, ensuring design decisions align cohesively with user requirements and overarching business goals.
- Familiarity with Agile methodologies, enabling efficient team collaboration and adaptive project management.

Projects

UR Budget Pal - Javascript, React

This is a Budget app that allows users to create their monthly budget by calculating their total income and expenses and determining the balance for the month. <https://ur-budget-pal.vercel.app/>

Book Connect - HTML, CSS and JavaScript

This is an introduction to my Web Application Project. It's an online library where users can search for books using keywords, change the website's theme, and preview specific books. <http://bit.ly/46d9BIN>
